Missoula

April 2013

Dear 3<sup>rd</sup>, 4<sup>th</sup>, 5<sup>th</sup>, or 6<sup>th</sup> Grade Teacher:

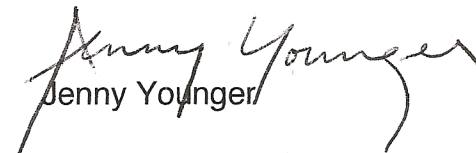

Please find enclosed the poster contest information and related curriculum materials for the **2014 Montana Energy Calendar, featuring the topic "Energy Efficiency In Action."** **Artwork must be postmarked by Saturday, June 15, 2013.**

Our goal in sponsoring the 2014 energy calendar poster contest is to help students and their families use energy in and around their homes, schools and communities more efficiently. By using energy wisely, we can save energy, money, and our natural resources!

Also enclosed in this packet are an extra contest brochure and copy of the National Energy Foundation's "Energy Efficiency in Action" poster (the curriculum for this contest). Please invite another teacher at your school to also participate this year. We would love to receive lots of poster entries.

Thank you for helping your students enter our poster contest. The Montana Energy Education Council has been sponsoring this fun energy education project every year since 1989, when we produced the very first energy calendar to celebrate Montana's Centennial. If you have questions about this year's contest or need additional materials, please contact me.

Happy Spring!

  
Jenny Younger
